Soft Water

Thanks to High Quality Resin!!!

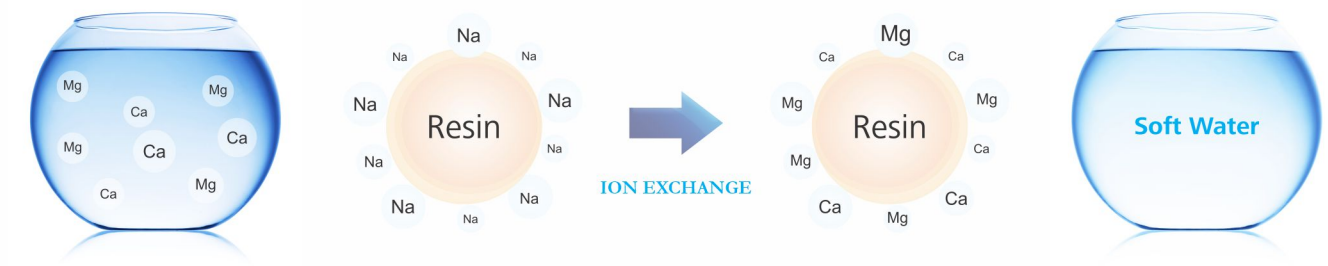
Sofpour is a high tech Water Softener that softens the water with its unique and state-of-the-art technology. It removes the unwanted hardness by eliminating Calcium & Magnesium ions and gives you soft and gentle water that takes care of your health and home. It is durable, maintenance free and economical as well.

CERTIFIED ISO 9001:2015 COMPANY

How Does Sofpour Water Softener Work?

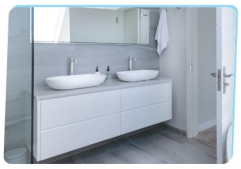
The unit of Sofpour water softener consists of a tank containing resin media. These resin beads are covered with sodium ions. The exchange of ions takes place on these resin beads. When hard water passes through these resin beads, exchange of ions takes place. Ions of minerals causing hardness, principally calcium and magnesium gets exchanged for sodium ions. This results in softness of water. After continuous usage, resin beads becomes saturated with ions of calcium and magnesium and has to be regenerated.

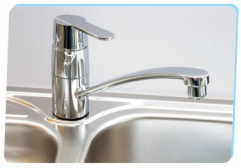
The process is called Recharging which can be conducted manually or can be automated. Recharging is done by flushing saturated resin beads with strong brine solution which again replaces mineral ions causing hardness with sodium ions. This resin can be recharged again and again.

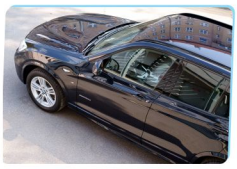


Benefits of Sofpour Water Softener

- Makes your bathing a luxurious experience
- Reduces hair loss and prevents hair and skin ailments
- Zero maintenance as FRP vessels and PVC fittings are resistant to corrosion
- No stains on your car
- Garments retain their natural look and feel
- Improves efficiency of water heaters and heating & cooling systems
- Reduces consumption of soap, shampoo and detergent. Soft water produces rich lather
- Expensive bathroom fittings, kitchen appliances & utensils retain their shine for longer span of time
- Eliminates plumbing problems caused due to scale formation
- Easy to install and operate. Operates without electricity







Sofpour works on ion exchange technology. Magnesium & Calcium ions are blocked by high quality, long lasting resin beads and gives you soft water with minimum maintenance. Sofpour automatic water softener is state-of-the-art, revolutionary product with a unique Automatic Multiport Valve.

Automatic Multiport Valve

This state of the art Automatic Multi Port Valve saves man hours and eliminates any possibility of human error as regeneration process does not involve any type of manual work or any human involvement. It also eliminates human involvement even in case of power failure as it restarts regeneration process from where it had stopped.

Unique Digital Display

Unique digital display communicates the working status of the softener:

- Child lock for eliminating chances of disturbance in the set program, normally due to any human interference
- Option for manual regeneration in case of change in routine priorities
- Displays remaining capacity of water that will be softened till next regeneration in m^3
- Displays present service flow rate in m^3/h
- Displays the preset regeneration time
- Displays the present clock
- Feather touch keys

Sofpour®

Multimedia Filter

Daily supply of water may contain mud, sand and other suspended impurities which needs to be removed to improve the quality of water. Sofpour multimedia filter uses specially graded sand for filtration.

There are multiple layers of sand with a variety in size and specific gravity. It can be used as a stand alone wholehouse filter and also can be used with the water softener as a pre-treatment to prevent mud, sand and other suspended impurities from clogging resin and hence enhances the performance of your softener.

Activated Carbon Filter

Activated carbon is most commonly used in water treatment or purification process. Sofpour Activated Carbon Filter significantly reduces/eliminates bad odour, taste, high chlorine levels and organic matter from daily supply of water.

Technical Specifications

Model	SPA 1248	SPA 1354	SPA 1465	SPA 1665
Vessel Size (Diameter & Height in Inches)	12 x 48	13 x 54	14 x 65	16 x 65
Vessel Volume	89 Litres	105 Litres	154 Litres	185 Litres
Resin Quantity	25 Litres	50 Litres	100 Litres	150 Litres
Output/Regeneration@ 200 ppm of $CaCo_3$ Hardness	7 m^3	14 m^3	28 m^3	42 m^3
Min. Working Pressure (in Kg/cm^2)	1.8 Kg/cm^2	1.8 Kg/cm^2	1.8 Kg/cm^2	1.8 Kg/cm^2
Max. Working Pressure (in Kg/cm^2)	3.5 Kg/cm^2	3.5 Kg/cm^2	3.5 Kg/cm^2	3.5 Kg/cm^2
Type and Size of Multiport Valve	Automatic Top Mounted MPV 25 NB	Automatic Top Mounted MPV 25 NB	Automatic Top Mounted MPV 25 NB	Automatic Top Mounted MPV 25 NB
Salt Requirement (in Kg)	3.5 Kg	7 Kg	14 Kg	21 Kg
Max. Flow Rate (m^3/hr)	4 m^3/hr	4 m^3/hr	4 m^3/hr	4 m^3/hr
