Sofpour Water Softner

Sofpour INDUSTRIAL *water solutions*

Sofpour Industrial Reverse Osmosis Systems are custom designed specifically for your water treatment needs. Sofpour builds the RO system using only high quality components that will provide reliable long-term operations. Sofpour offers hydrostatically tested and ready to produce Water RO Systems to its clients and is backed up by an operator training and detailed documentation to further ease the operations at your end.

We also provide the pretreatment equipment and chemistry required to ensure optimal performance and life span of your RO membranes. You can feel confident knowing that we have a full service support team available to assist you for any specific application requirement.

Sofpour Water Softening System - Features

- Easy installation, operation and service.
- Automatic softeners are available for auto recharging and rinsing.
- Softeners are available that can handle high flow rates and high pressure for variety of applications.
- High grade resins are used for ensuring best results and durability of the system.
- Vessel MOC options as FRP and MS Rubber Lining are available.

Sofpour Reverse Osmosis System - Features

- Standard Output Capacities : 50 LPH, 100 LPH, 250 LPH, 500 LPH, 1000 LPH, 1500 LPH, 2000 LPH, 3000 LPH, 4000 LPH.
- Easy installation, operation and service.
- Microprocessor based control panel for ease of operation and inbuilt process logic.
- Automatic backwashing of filters is carried out at regular intervals by pre-programmed control panel.
- Highly durable and efficient High Pressure Pump in SS 304/316 construction.
- Rotameter for measuring permeate flow and waste water flow.
- Glycerin filled pressure gauges for high precision and durability
- Skid MOC options available in SS 304 and MS Powder Coating
- Automatic start/stop based on water level in the tank.
- Fully Automatic RO Plants are available.
- Stainless Steel (MOC) RO Plants are available.

Unique Features

- Remove active and inactive bacteria
- Healthy & hygienic water for various applications
- Non-toxic water
- Smell & fungus free water
- Durable & maintenance free
- Best suited for small and large industries
- Reliable and cost-effective for all industrial usage
- Fully automatic system offers safe & pure water
- Easy to install and service
- Dedicated support team of technicians

At Sofpour, we can offer customized need based solutions to varied industries. In case you have any particular / specific requirements, do let us know and we'll develop special product based on that requirement.
